Peleg Benson Wing.	Typhoid Fever.
Francis Pierce Whitaker,	Diphtheria.

ANNOUNCEMENT.

The Medical School of Maine, by an Act of the Legislature, is placed under the superintendence and direction of the Board of Trustees and Overseers of Bowdoin College. By their joint authority all the degrees of M. D. are conferred.

The 64th Course of Lectures will commence February 7th, 1884, and continue sixteen weeks. The introductory lecture will be delivered at 3 o'clock P. M., by Prof. Charles W. Goddard

MEANS OF INSTRUCTION.

The specimens of Normal, Morbid and Comparative Anatomy are annually increased in number. The Museum has lately been thoroughly rearranged and enriched by purchases abroad.

The Chemical Department embraces every article of apparatus essential to a complete illustration of the principles of Chemistry.

A new laboratory has recently been furnished for special courses in analytical chemistry, urinary analysis and toxocology. These courses are strongly recommended to every student.

The lectures in Physiology are illustrated by Auzoux models and by experiments.

Instruction in Normal and Pathological Histology is afforded without extra charge,

Students are advised to prepare for their Anatomical and Physiological studies by the dissection of the cat, dog, rabbit and frog, using Wilder & Gage's Anatomical Technology, Foster & Langley's Practical Physiology, or Huxley & Martin's Biology.

CLINICS.

Clinics are held every SATURDAY MORNING during the second half of the term. Patients requiring medical or surgical advice and treatment may present themselves on Saturday mornings from 8 to 11 o'clock.

All examinations in the presence of the Class are made without charge. All surgical operations are gratuitously performed.

TERMS OF ADMISSION.

Candidates for Matriculation will be required to give evidence that they possess a good English education. Those who are graduates of Colleges, Normal Schools, High Schools, or have passed the entrance examination to any recognized College, on presentation of their diplomas or matriculation tickets, will be exempt from examination. Examinations will be held on THURSDAY, FEBRUARY 7th, at 9 o'clock, A. M.

The Fee for admission to the several Courses of Lectures, *payable strictly in advance, and by cash only*, is $78. Matriculation Fee, payable each term, $5.

Pupils who have attended two full courses of Medical Lectures, one of which has been in this School, are admitted to all subsequent courses without payment of any Lecture Fees.

Students who have attended two full courses at other regular Medical Institutions, are required to pay $25 for admission to their first course of Lectures at this School, in addition to the Matriculation Fee.

The Graduation Fee, (which is not returnable), including the Diploma, is $25. Fee for Analytical Chemistry, $10.

No student will be allowed to attend any Course of Lectures in this School, without the certificate of the Secretary. Members of the Medical Profession are cordially invited to attend the Lectures at any time.

Graduates of other Schools, who have been engaged three years in the regular practice of medicine, may receive a general ticket upon presentation of their diplomas and payment of the Matriculation Fee. Students are expected to remain till the close of the term.

EXAMINATIONS AND GRADUATION.

Students, and particularly candidates for a Degree, are examined either daily or weekly on the subjects of the Lectures. Especial attention is directed to the fact that members of the Faculty, in each department, hold gratuitous examinations on specified days of each week, upon the subjects of the Lectures.

The Faculty, believing it to be desirable for students to pay especial attention to the primary branches during the first portion of their course of study, in order that they may be better prepared to appreciate the more advanced subjects in the latter part, voted seven years ago, that any student might present himself for examination in Anatomy, Physiology and Chemistry(any or all), at the regularly appointed time for examination, provided he previously presented to the Secretary satisfactory evidence that, at the close of the current term, he had completed at least twelve months of actual study, and had attended a full course of lectures in this School. Those who are examined in Anatomy are required to present evidence that they have under competent instructors dissected not less than two parts. The same requirements will be enforced in the cases of those who are examined in this department at graduation. Three years ago they voted additionally that any student may present himself for final examination in Materia Medica and Therapeutics, and in Obstetrics, at the regularly appointed time for examination, providing he previously presents to the Secretary satisfactory evidence that, at the close of the current term, he shall have completed at least two years of actual study and have attended two courses of Lectures, the second of which must have been in this School. An official record of the result of the successful examinations shall be kept by the Secretary. The successful passage of an examination will not exempt a student from faithful attendance upon any exercises in any department during subsequent courses.

The examinations for the Degree of Doctor of Medicine are held by the Faculty of Medicine at the close of the course of Lectures. Degrees are conferred at Commencement.

The candidates must be twenty-one years of age, and must have devoted three years to their professional studies under the direction of a regular Practitioner of Medicine. They must have attended two full courses of Lectures in some regular, incorporated Medical Institution; and the last course previous to examination must have been at this School. They must deposit with the Secretary of the Faculty satisfactory certificates of good moral character, and of having pursued their medical studies for the required term. They must also pass a satisfactory written and oral examination in Anatomy, Physiology, Surgery, Chemistry, Materia Medica, Pharmacy, Obstetrics, Pathology and Practice. They must also present a Thesis or Dissertation on some medical subject, a fair copy of which must be deposited with the Secretary of the Faculty at least ten days before the commencement of the examination at the close of the Lectures. These copies are preserved in the Medical Library.

Students on arriving should call at once on the Secretary of the Faculty, A. Mitchell, to enter their names, present their certificates, and purchase their tickets. They may also obtain from him all necessary information in regard to boarding houses.

Price of Board from $3.00 to $5.00. per week.

By order of the Faculty,

ALFRED MITCHELL, M. D., Secretary.

Brunswick, July, 1883.

TEXT BOOKS.

Anatomy—*Text Books*, Quain, or Gray; *for the dissecting room*, Ellis's Demonstrations, or Heath's Practical Anatomy; *for reference*, Braune's Topographical Anatomy, Flower on the Nerves, Frye's, or Satterthwait's Histology.

Chemistry—Beilstein's Elements of Qualitative Analysis, Roscoe's Chemistry, Watt's Dictionary of Chemistry, Janot's Physics.

Physiology—Ashby, Dalton, Flint, Foster, Martin.

Materia Medica and Therapeutics—Bartholow, H. C. Wood, Biddle, Stille, Ringer, Headland, Gerrish on Prescription Writing.

Practice of Medicine—Flint, Bartholow, Roberts, Bristowe, Niemeyer.

Pathology—Green, Reindfleisch, Wagner, Virchow.

Physical Diagnosis—Clapp's Tabular Handbook, Flint, Da Costa, Loomis.

Diseases of Children—J. L. Smith, Vogel, West.

Surgery—Agnew, Gross, Erichsen, Druit, Clark, Greene's Questions, Gerrish's Translation of Championniere's Antiseptic Surgery.

Surgical Pathology—Billroth, Paget.

Midwifery—Lusk, Playfair, Leishman.

Diseases of Women—Thomas, Barnes.

Medical Jurisprudence—Tyler, Ordronaux, Beck.

ANNOUNCEMENT.

The Medical School of Maine, by an Act of the Legislature is placed under the Superintendance and direction of the Board of Trustees and Overseers of Bowdoin College. By their joint authority all the degrees of M. D., are conferred.

The 72nd Course of Lectures will begin February 4th, 1892, and continue twenty weeks, ending June 22nd. The introductory lecture will be delivered at 3 o'clock P. M., by Prof. Charles D. Smith, M. D.

MEANS OF INSTRUCTION.

The specimens in Normal, Morbid and Comparative Anatomy are annually increased in number. The Museum has lately been thoroughly re-arranged and enriched by purchases abroad.

The Chemical Department embraces every article of apparatus essential to complete illustration of the principles of Chemistry.

A new laboratory has recently been furnished for special courses in analytical chemistry, urinary analysis and toxocology. These courses are compulsory. They will be entered upon immediately after the closing work in the dissecting room.

The lectures in Physiology are illustrated by Auzoux models and by experiments.

Prof. Charles D. Smith will continue his instruction in a short course of lectures upon Public Hygiene.

Instruction in Normal and Pathological Histology is afforded without extra charge. A short course of Lectures upon Microscopy will be given by the Demonstrator of Histology. Students owning Microscopes are requested to bring them for use in their classes.

Students are advised to prepare for their Anatomical and Physiological studies by the dissection of the cat, dog, rabbit and frog, using Wilder & Gage's Anatomical Technology, Foster & Langley's Practical Physiology, or Huxley & Martin's Biology. Abundant Dissecting Material is furnished at cost.

CLINICS.

In place of a single joint clinic as heretofore, separate Medical and Surgical Clinics will be held every week during the term.

The Surgical Clinic will be held every Saturday morning, beginning at quarter past eight o'clock and closing at quarter past eleven.

The Medical Clinic will be held every Thursday morning, beginning at quarter past ten o'clock and closing at quarter past eleven.

No Medical Cases will be received on Saturdays, and no Surgical Cases on Thursdays.

All examinations in the presence of the Class are made without charge. All surgical operations are gratuitously performed.

TERMS OF ADMISSION AND FEES.

Especial attention is called to the new requirement of attendance upon three full courses of lectures before graduation; this condition and the corresponding re-adjustment of fees become operative in the cases of all who will graduate after 1892; in order that no misunderstanding may arise on the part of those who have hitherto attended one or more courses of lectures, it is thought best to state that conditions of lecture attendance and payment of fees will be regarded and received as hitherto announced.

It is desired that a literal interpretation shall be placed upon the stated requirements of the candidates for Matriculation, as hitherto there have been not unfrequent examples of those who inquire if other conditions than those named will not serve in lieu of the examination. The same consideration is asked for the explicit conditions named as regulating the prepayment in cash of fees.

Candidates for Matriculation will be required to give evidence that they possess a good English education, including a knowledge of English composition, Natural Philosophy and Mathematics. Those who are graduates of Colleges, Normal Schools, High Schools, or have passed the entrance examination to any recognized College, on presentation of their diplomas or matriculation tickets, will be exempt from examination. Examinations will be held on THURSDAY, FEBRUARY 4th, at 9 o'clock A. M.

The Fees for admission to the several Courses of Lectures, PAYABLE STRICTLY IN ADVANCE, AND BY CASH ONLY, are $78 00 for first and second courses and $50.00 for the third course. Matriculation Fee payable each term, $5.00.

Pupils who have attended three full courses of Medical Lectures, two of which have been in this School, are admitted to all subsequent courses without payment of any Lecture Fees.

Students who have attended two full courses at other regular Medical Institutions, are required to pay $50 for admission to their first course of Lectures at this School, in addition to the Matriculation Fee.

A fee of five dollars shall be paid for final examination in each department in which a student presents himself for examination previously to the payment of his diploma fee.

If a student fails to pass the examination in a given department in one year, he may be examined in a subsequent year in the same branch on payment of a fee of three dollars.

The total amount paid by a student in examination fees at FIVE DOLLARS each shall be credited on his diploma fee.

The Graduation Fee, (which is not returnable), including the diploma, is $25.00.

No student will be allowed to attend any Course of Lectures in this School, without the certificate of the Secretary. Members of the Medical Profession are cordially invited to attend the Lectures at any time.

Graduates of other Schools, who have been engaged three years in the regular Practice of medicine, may receive a general ticket upon presentation of their diplomas and payment of the Matriculation Fee. Students are expected to remain until the close of the term.

EXAMINATIONS AND GRADUATION.

Students and particularly candidates for graduation will be examined at least twice each week in each department by its Professor.

The Faculty, believing it to be desirable for students to pay especial attention to the primary branches during the first portion of their course of study, in order that they may be better prepared to appreciate the more advanced subjects, in the latter part, have arranged that any student may present himself for examination in Anatomy, Physiology and Chemistry (any or all), at the regularly appointed time for examination, provided he has previously presented to the Secretary satisfactory evidence that, at the close of the current term, he has completed at least twelve months of actual study, and has attended a full course of lectures in this School. Those who are examined in Anatomy are required to present evidence that they have under competent instructors dissected not less than two parts. The same requirements will be enforced in the cases of those who are examined in this department at graduation. Any student may also present himself for final examinations in Materia Medica and Therapeutics, and in Obstetrics, at the regularly appointed time for examination, providing he previously presents to the Secretary satisfactory evidence that, at the close of the current term, he shall have completed at least two years of actual study and have attended two courses of Lectures, the second of which must have been in this School. An official record of the result of the successful examinations shall be kept by the Secretary. The successful passage of an examination will not exempt a student from faithful attendance upon any exercises in any department during subsequent courses.

The examinations for the Degree of Doctor of Medicine are held at the close of the course of Lectures. Degrees will be conferred upon Wednesday morning, June 22nd, after the usual graduating exercises.

The candidates must be twenty-one years of age, and must have devoted three years to their professional studies under the direction of a regular Practioner of Medicine. They must have attended three full courses of Lectures (operative after 1892) in some regular, incorporated Medi-

cal Institution, and the last course previous to examination must have been at this School, and fifteen months' time must elapse between the beginning of a Student's first course of lectures and his graduation. They must deposit with the Secretary of the Faculty satisfactory certificates of good moral character, and of having pursued their medical studies for the required term. They must also pass a satisfactory written and oral examination in Anatomy, Physiology, Surgery, Chemistry, Materia Medica, Pharmacy, Obstetrics, Pathology and Practice. They must also present a Thesis or Dissertation on some medical subject, a fair copy of which must be deposited with the Secretary of the Faculty at least ten days before the commencement of the examination at the close of the Lectures. These copies are preserved in the Medical library.

Students on arriving should call at once at the office of the college to enter their names, present their certificates, and purchase their tickets. They also can obtain there all necessary information in regard to boarding houses.

Price of Board from $3.00 to $5.00 per week.

By order of the Faculty,

ALFRED MITCHELL, M. D., Secretary.

Brunswick, September 1891.

TEXT BOOKS.

Anatomy—Text Books, Quain or Gray. For the Dissecting Room, Weisse's Practical Human Anatomy, Ellis's Demonstrations, or Heath's Practical Anatomy.

Chemistry—Bartley's Medical, Richter's Organic and Inorganic.

Physiology—Yoe, Laudois, Foster, Kirk.

Materia Medica and Therapeutics—Bartholow, Brunton, H. C. Wood, Gerrish on Prescription Writing.

Practice of Medicine—Flint, Bartholow, Bristow, Loomis, Strumpell.

Pathology—Green, Rindfleisch, Elements, Ziegler's Text book.

Physical Diagnosis—Flint, DaCosta, Loomis, Siefert & Muller.

Diseases of Children—J. L. Smith, Vogle, West.

Surgery—Agnew, Gross, Erichsen, Druit, Clark.

Surgical Pathology—Billroth, Paget.

Midwifery—Lusk, Playfair, Parvin, Galabin.

Diseases of Women—Thomas, Winckle, Skene.

Medical Jurisprudence—Tyler, Ordronaux, Beck.

ANNOUNCEMENT.

THE MEDICAL SCHOOL OF MAINE, by an act of the Legislature is placed under the Superintendence and direction of the Board of Trustees and Overseers of Bowdoin College. By their joint authority all the degrees of M. D. are conferred.

The 76th Course of Lectures will begin January 9th, 1896, and continue twenty-four weeks, ending June 25th. The introductory lecture will be delivered at 3 o'clock P. M., by Prof. Alfred Mitchell, M. D.

MEANS OF INSTRUCTION.

The specimens in Normal, Morbid and Comparative Anatomy are annually increased in number. The Museum has lately been thoroughly re-arranged and enriched by purchases abroad.

The Chemical Department embraces every article of apparatus essential to complete illustration of the principles of Chemistry.

The laboratories in the Mary F. S. Searles Science Building furnish unsurpassed advantages for special courses in analytical chemistry, urinary analysis and toxocology. These courses are compulsory. They will be entered upon immediately after the closing work in the dissecting room.

The lectures in Physiology are illustrated by Auzoux models and by experiment.

Prof. Charles D. Smith, will continue his instruction in a short course of lectures upon Public Hygiene.

Prof. A. R. Moulton of the Staff of the Pennsylvania Hospital for the Insane, will give a short course upon Mental Diseases.

Instruction in Normal and Pathological Histology is afforded without extra charge. A short course of Lectures upon Microscopy will be given by the Demonstrator of Histology. Students owning Microscopes are requested to bring them for use in their classes.

Students are advised to prepare for their Anatomical and Physiological studies by the dissection of the cat, dog, rabbit and frog, using Wilder & Gage's Anatomical Technology, Foster &

Langley's Practical Physiology, or Huxley & Martin's Biology. Abundant Dissecting Material is furnished at cost.

CLINICS.

The Surgical Clinic will be held every Saturday morning, beginning at quarter past eight o'clock and closing at quarter past eleven.

Prof. W. B. Moulton will give Clinical instruction in diseases of the Ear and Eye.

The Medical Clinic will be held every Thursday morning, beginning at quarter past ten o'clock and closing at quarter past eleven.

No Medical Cases will be received on Saturdays, and no Surgical Cases on Thursdays.

All examinations in the presence of the Class are made without charge. All surgical operations are gratuitously performed.

TERMS OF ADMISSION AND FEES.

It is desired that a literal interpretation shall be placed upon the stated requirements of the candidates for Matriculation, as hitherto there have been not infrequent examples of those who inquire if other conditions than those named will not serve in lieu of the examination. The same consideration is asked for the explicit conditions named as regulating the prepayment in cash of fees.

Candidates for Matriculation will be required to give evidence that they possess a good English education, including a knowledge of English composition, Natural Philosophy and Mathematics. Those who are graduates of Colleges, Normal Schools, High Schools, or have passed the entrance examination to any recognized College, on presentation of their diplomas or matriculation tickets, will be exempt from examination. Examinations will be held on THURSDAY, JANUARY 9TH, at 9 o'clock, A. M.

The Fees for admission to the several courses of Lectures, PAYABLE STRICTLY IN ADVANCE, AND BY CASH ONLY, are $78.00 for first and second courses and $50.00 for the third course. Matriculation Fee payable each term, $5.00.

Pupils who have attended three full courses of Medical Lectures, two of which have been in this School, are admitted to all subsequent courses without payment of any Lecture Fees.

Students who have attended two full courses at other regular Medical Institutions, are required to pay $50.00 for admission to

their first course of Lectures at this School, in addition to the Matriculation Fee.

A fee of five dollars shall be paid for final examination in each department in which a student presents himself for examination previously to the payment of his diploma fee.

The payment of five dollars includes the cost of examinations of first and second years in Anatomy, Physiology and Chemistry.

If a student fails to pass the examination in a given department in one year, he may be examined in a subsequent year in the same branch on payment of a fee of three dollars.

The total amount paid by a student in examination fees at FIVE DOLLARS each shall be credited on his diploma fee.

The Graduation Fee, (which is not returnable,) including the diploma, is $25.00.

NO STUDENT WILL BE ALLOWED TO ATTEND ANY COURSE OF LECTURES IN THIS SCHOOL WITHOUT THE CERTIFICATE OF THE SECRETARY. Members of the Medical Profession are cordially invited to attend the Lectures at any time.

Graduates of other Schools, who have been engaged three years in the regular practice of medicine, may receive a general ticket upon presentation of their diplomas and payment of the Matriculation Fee. Students are expected to remain until the close of the term.

EXAMINATIONS AND GRADUATION.

Students and particularly candidates for graduation will be examined at least twice each week in each department by its Professor.

The following regulations are provided in the departments of Anatomy, Physiology, Chemistry and Obstetrics, these regulations not applying in whole to those who have previously attended two or more courses of lectures.

ANATOMY.

At the end of their first year in the school students will be examined in histology, the anatomy of the skeleton and the viscera.

At the end of the second year students will be examined in the remainder of descriptive anatomy and in topographical anatomy. Two parts must have been satisfactorily dissected and demonstrated before admission to the second year examination and two full

years of Medical study completed. A part of the hours previously occupied with lectures will be devoted to text book recitations.

PHYSIOLOGY.

At the end of the first year of study every student shall be examined in Physiology upon the functions of nutrition and reproduction, and if he presents a certificate of having completed two full years of medical study or of having pursued approved courses in this branch in a reputable college or technical school he may also be examined upon the functions of relation.

At the end of the second year every student shall be examined upon the functions of relation unless he shall have passed the entire examination at the end of the first year.

A portion of the hours in this department also will be devoted to text book recitations from Blakiston's edition of Kirkes Physiology.

CHEMISTRY.

The chemical course extends through two years, in the first year are lectures and recitations three hours in each week. In the second year the course mainly consists of laboratory work in analytical and medical chemistry six hours in each week for one half the term.

At the end of the first year each student shall be examined upon the chemistry of the first year, if he presents a certificate of having completed two full years of medical study or of having pursued approved courses in chemistry in a reputable college or technical school, he may also be examined in the chemistry of the second year.

At the end of the second year of study each student shall be examined upon the chemical study of the second year unless he shall have passed the entire chemical examination of the first year.

A student who has pursued approved courses in chemistry in a reputable college or technical school may pass an examination on the chemistry of the first year at the beginning of the course.

OBSTETRICS.

Any student may also present himself for final examination in Obstetrics at the regularly appointed time for examination, provided he previously presents to the Secretary satisfactory evidence

that, at the close of the current term, he shall have completed at least two years of actual study and have attended two courses of Lectures, the second of which must have been in this School. Recitations from text book will occupy a portion of the hours previously devoted to lectures.

Students will receive from the professors in the departments of Anatomy, Physiology, Chemistry and Obstetrics certificates of successful passing of final examinations.

Students failing to pass the examination in Anatomy, Physiology and Chemistry will be granted a re-examination at the beginning of the succeeding term, but failure upon that occasion will compel a repetition of the first year's work.

At the beginning of the third year a re-examination also will be granted those who fail in the examinations of the second year—if failure again results in any or all of these departments it will prevent one from entering the graduating class. The successful passage of an examination will not exempt a student from faithful attendance upon any exercises in any department during subsequent courses.

The examinations for the Degree of Doctor of Medicine are held at the close of the course of Lectures. Degrees will be conferred upon Wednesday morning, June 25th, after the usual graduating exercises.

The candidates must be twenty-one years of age, and must have devoted three years to their professional studies under the direction of a regular Practitioner of Medicine. They must have attended three full courses of Lectures in some regular, incorporated Medical Institution, and the last course previous to examination must have been in this School. They must deposit with the Secretary of the Faculty satisfactory certificates of good moral character and having pursued their medical studies for the required term. They must also pass a satisfactory written and oral examination in Anatomy, Physiology, Surgery, Chemistry, Materia Medica, Obstetrics, Pathology and Practice, Medical Jurisprudence. They must also present a Thesis on some medical subject, a fair copy of which must be deposited with the Secretary of the Faculty at least ten days before the commencement of the examination at the close of the Lectures. These copies are preserved in the Medical library.

Students on arriving should call at once at the office of the college to enter their names, present their certificates, and purchase their tickets.

They also can obtain there all necessary information in regard to boarding houses.

Price of Board from $3.00 to $5.00 per week.

By order of the Faculty.

ALFRED MITCHELL, M. D., SECRETARY.

BRUNSWICK, July, 1896.

TEXT BOOKS.

ANATOMY—Gray or Quain. FOR THE DISSECTING ROOM, Weisse, Ellis, Heath or Holden.

CHEMISTRY—Stover and Lindsay Elementary Manual, Simon's Manual, Pellew's Medical, Tyson's Urinalysis, Robinson's Brief Notes

PHYSIOLOGY—Kirkes, Yeo, Landois and Stirling or Foster's for reference.

MATERIA MEDICA AND THERAPEUTICS—Brunton, H. C. Wood, Hare, White & Wilcox.

PRACTICE OF MEDICINE—Osler, Pepper's American Text Book of Theory and Practice, Flint, Loomis, Strumpell, Gowers' Diseases of the Nervous System, Duane's Student's Medical Dictionary.

PATHOLOGY—Green, Rindfleisch, Elements, Ziegler's Text book.

PHYSICAL DIAGNOSIS—Flint, DaCosta, Loomis, Siefert & Muller.

DISEASES OF CHILDREN—J. L. Smith, Vogle, West.

SURGERY—The American Text Book of Surgery, Agnew, Gross, Erichson, Druit, Clark.

SURGICAL PATHOLOGY—Billroth, Paget.

MIDWIFERY—Lusk, Playfair, Parvin, Galabin, Reynolds.

DISEASES OF WOMEN—Thomas & Munde, Skene, Davenport's Manual.

MEDICAL JURISPRUDENCE—Tyler, Ordronaux, Beck.

Bowdoin Medical Alumni Association.

ORGANIZED 1884.

OFFICERS.

President—H. H. Hunt, M. D.,	Portland
1st Vice President—D. A. Robinson, M. D.,	Bangor
2d Vice President—B. F. Dunn, M. D.,	Windham
Secretary—Charles D. Smith, M. D.,	Portland
Treasurer—F. H. Gerrish, M. D.,	Portland

These five officers constitute the Executive Committee.

The objects of the Association are the revival of the memories of student life, the establishment and perpetuation of friendly relations among the graduates of the Medical Department of Bowdoin College, and the advancement of the interest of medical education.

Any person on whom a degree in medicine has been conferred by Bowdoin College may become a member of this society by signifying his desire to this effect in writing to the Secretary, and paying one dollar to the Treasurer, provided his character and professional standing be satisfactory to the Executive Committee.

The annual meeting is held at the Medical School on the day of the graduating exercises.

It is hoped that all graduates of the Medical School of Maine will immediately take the steps necessary to become members of the Alumni Association, as the success of the Society contributes to the prosperity of their Alma Mater.

William Guy Wren,	Typhoid Fever

ANNOUNCEMENT.

THE MEDICAL SCHOOL OF MAINE, by an act of the Legislature is placed under the Superintendence and direction of the Board of Trustees and Overseers of Bowdoin College. By their joint authority all the degrees of M. D. are conferred.

The 77th Course of Lectures will begin January 7th, 1897, and continue twenty-four weeks, ending June 25th. The introductory lecture will be delivered at 3 o'Clock P. M., by Prof. Charles O. Hunt, M. D.

MEANS OF INSTRUCTION.

The specimens in Normal, Morbid and Comparative Anatomy are annually increased in number. The Museum has lately been thoroughly re-arranged and en-riched by purchases abroad.

The Chemical Department embraces every article of apparatus essential to complete illustration of the principles of Chemistry.

The laboratories in the Mary F. S. Searles Science Building furnish unsurpassed advantages for special courses in analytical chemistry, urinary analysis and toxocology. These courses are compulsory. They will be entered upon immediately after the closing work in the dissecting room.

The lectures in Physiology are illustrated by Auzoux models and by experiment.

Prof. Charles D. Smith will continue his instruction in a short course of lectures upon Public Hygiene.

Prof. A. R. Moulton of the Staff of the Pennsylvania Hospital for the Insane, will give a short course upon Mental Diseases.

Instruction in Normal and Pathological Histology is afforded without extra charge. A short course of Lectures upon Microscopy will be given by the Demonstrator of Histology. Students owning Microscopes are requested to bring them for use in their classes.

Students are advised to prepare for their Anatomical and Physiological studies by the dissection of the cat, dog, rabbit and frog, using Wilder & Gage's Anatomical Technology, Foster & Langley's Practical Physiology, or Huxley & Martin's Biology. Abundant Dissecting Material is furnished at cost.

CLINICS.

The Surgical Clinic will be held every Saturday morning, beginning at quarter past eight o'clock and closing at quarter past eleven.

Prof. W. B. Moulton will give Clinical instruction in diseases of the Ear and Eye.

The Medical Clinic will be held every Thursday morning, beginning at quarter past ten o'clock and closing at quarter past eleven.

No Medical Cases will be received on Saturdays, and no Surgical Cases on Thursdays.

All examinations in the presence of the Class are made without charge. All surgical operations are gratuitously performed.

TERMS OF ADMISSION AND FEES.

It is desired that a literal interpretation shall be placed upon the stated requirements of the candidates for Matriculation, as hitherto there have been not infrequent examples of those who inquire if other conditions than those named will not serve in lieu of the examination. The same consideration is asked for the explicit conditions named as regulating the prepayment in cash of fees.

Candidates for Matriculation will be required to give evidence that they possess a good English education, including a knowledge of English composition, Natural Philosophy and Mathematics. Those who are graduates of Colleges, Normal Schools, High Schools, or have passed the entrance examination to any recognized College, on presentation of their diplomas or matriculation tickets, will be exempt from examination. All without exception who have not such diplomas or tickets will be required to pass the entrance ex-

amination which will be held on THURSDAY, JANUARY 7TH, at 9 o'clock A. M. Especial attention is called to the following announcement: Candidates presenting themselves for admission to the session of 1898 and subsequent sessions, will be required to show that they possess, in addition to the above requirements, such a knowledge of Latin as is embraced in the ability to read at sight, exercises similar to those found in Harkness' Latin Reader. They will also be required to show that they have mastered the elements of Chemistry as taught in manuals similar to that of the inorganic part of "Remsen's Introduction to Chemistry."

The Fees for admission to the several courses of Lectures, PAYABLE STRICTLY IN ADVANCE, AND BY CASH ONLY, are $78.00 each for first and second courses, and $50.00 for the third course. Matriculation Fee payable each term, $5.00.

Pupils who have attended three full courses of Medical Lectures, two of which have been in this School, are admitted to all subsequent courses without payment of any Lecture Fees.

Students who have attended two or more full courses at other regular Medical Institutions, are required to pay $50.00 for admission to their first course of Lectures at this School, in addition to the Matriculation Fee.

A fee of five dollars shall be paid for final examination in each department in which a student presents himself for examination previously to the payment of his diploma fee.

The payment of five dollars includes the cost of examinations of first and second years in Anatomy, Physiology and Chemistry.

A nominal charge will be made to cover the cost of materials used in the chemical laboratory.

If a student fails to pass the examination in a given department in one year, he may be examined in a subsequent year in the same branch on payment of a fee of three dollars.

The total amount paid by a student in examination fees at FIVE DOLLARS each shall be credited on his diploma fee.

The graduation fee, (which is not returnable,) including the diploma, is $25.00.

NO STUDENT WILL BE ALLOWED TO ATTEND ANY COURSE OF LECTURES IN THIS SCHOOL WITHOUT THE CERTIFICATE OF THE SECRETARY. Members of the Medical Profession are cordially invited to attend the Lectures at any time.

Graduates of other Schools, who have been engaged three years in the regular practice of medicine, may receive a general

ticket upon presentation of their diplomas and payment of the Matriculation Fee. Graduates of other schools are not eligible for a degree from this school without attendance upon a full course of lectures immediately preceding the examination for such a degree.

Students are expected to remain until the close of the term.

EXAMINATIONS AND GRADUATION.

Students and particularly candidates for graduation will be examined at least twice each week in each department by its Professor.

The following regulations are provided in the departments of Anatomy, Physiology, Chemistry and Obstetrics, these regulations not applying in whole to those who have previously attended two or more courses of lectures.

ANATOMY.

At the end of their first year in the school students will be examined in histology, the anatomy of the skeleton and the viscera.

At the end of the second year students will be examined in the remainder of descriptive anatomy and topographical anatomy. Two parts must have been satisfactorily dissected and demonstrated before admission to the second year examination and two full years of Medical study completed. A part of the hours previously occupied with lectures will be devoted to text book recitations.

PHYSIOLOGY.

At the end of the first year of study every student shall be examined in Physiology upon the functions of nutrition and reproduction, and if he presents a certificate of having completed two full years of medical study or of having pursued approved courses in this branch in a reputable college or technical school he may also be examined upon the functions of relation.

At the end of the second year every student shall be examined upon the functions of relation unless he shall have passed the entire examination at the end of the first year.

A portion of the hours in this department also will be devoted to text book recitations from Blakiston's edition of Kirke's Physiology.

CHEMISTRY.

The chemical course extends through two years, in the first year are lectures and recitations three hours in each week. In the second year the course mainly consists of laboratory work in analytical and medical chemistry six hours in each week for one half the term.

At the end of the first year each student shall be examined upon the chemistry of the first year, if he presents a certificate of having completed two full years of medical study or of having pursured approved courses in chemistry in a reputable college or technical school, he may also be examined in the chemistry of the second year.

At the end of the second year of study each student shall be examined upon the chemical study of the second year unless he shall have passed the entire chemical examination of the first year.

A student who has pursued approved courses in chemistry in a reputable college or technical school may pass an examination on the chemistry of the first year at the beginning of the course.

OBSTETRICS.

Any student may also present himself for final examination in Obstetrics at the regularly appointed time for examination, provided he previously presents to the Secretary satisfactory evidence that, at the close of the current term, he shall have completed at least two years of actual study and have attended two courses of Lectures, the second of which must have been in this School. Recitations from text book will occupy a portion of the hours previously devoted to lectures.

Students will receive from the secretary of the faculty certificates of successful passing of final examinations in Anatomy, Physiology, Chemistry and Obstetrics.

Students failing to pass the examination in Anatomy, Physiology and Chemistry will be granted a re-examination at the beginning of the succeeding term, but failure upon that occasion will compel a repetition of the first year's work.

At the beginning of the third year a re-examination also will be granted those who fail in the examinations of the second year—if failure again results in any or all of these departments it will prevent one from entering the graduating class. The successful

passage of an examination will not exempt a student from faithful attendance upon any exercises in any department during subsequent courses.

The examinations for the Degree of Doctor of Medicine are held at the close of the course of Lectures. Degrees will be conferred upon Wednesday morning, June 23rd, after the usual graduating exercises.

The candidates must be twenty-one years of age, and must have devoted three years to their professional studies under the direction of a regular Practitioner of Medicine. They must have attended three full courses of Lectures in some regular, incorporated Medical Institution, and the last course previous to examination must have been in this School. They must deposit with the Secretary of the Faculty satisfactory certificates of good moral character and having pursued their medical studies for the required term. They must also pass a satisfactory written and oral examination in Anatomy, Physiology, Surgery, Chemistry, Materia Medica, Obstetrics, Pathology and Practice, Medical Jurisprudence. They must also present a Thesis on some medical subject, a fair copy of which must be deposited with the Secretary of the Faculty at least ten days before the commencement of the examination at the close of the Lectures. These copies are preserved in the Medical library.

Students on arriving should call at once at the office of the college to enter their names, present their certificates, and purchase their tikcets. They also can obtain there all necessary information in regard to boarding houses.

Price of board from $3.00 to $5.00 per week.

By order of the Faculty.

ALFRED MITCHELL, M. D., SECRETARY.

BRUNSWICK, August, 1896.

TEXT BOOKS.

ANATOMY—Gray or Quain. For the Dissecting Room, Weisse, Ellis, Heath or Holden.

CHEMISTRY—Stover and Lindsay Elementary Manual, Simon's Manual, Pellew's Medical, Tyson's Urinalysis, Robinson's Brief Notes.

PHYSIOLOGY—For recitation work Blakiston's edition of Kirkes. For reference, Landois and Stirling, Foster, Dalton.

PUBLIC HYGIENE—For reference, Coplin and Bevan, Rohe, Parke's Practical Hygiene.

MATERIA MEDICA AND THERAPEUTICS—Brunton, H. C. Wood, Hare, White & Wilcox.

PRACTICE OF MEDICINE—Osler, Pepper's American Text Book of Theory and Practice, Flint, Loomis, Strumpell, Gowers' Diseases of the Nervous System, Duane's Student's Medical Dictionary, American Year Book of Medicine and Surgery.

PATHOLOGY—Green, Rindfleisch, Elements, Ziegler's Text book.

PHYSICAL DIAGNOSIS—Flint, DaCosta, Loomis, Siefert & Muller.

DISEASES OF CHILDREN—J. L. Smith, Rotch.

SURGERY—The American Text Book of Surgery last edition, Dennis System of Surgery, Park System of Surgery, Warren's Surgical Pathology and Therapeutics.

MIDWIFERY—Parvin, Lusk, Playfair. Manuals, Dorland's, Fothergill's. For reference, American Text Book of Obstetrics.

DISEASES OF WOMEN—Pozzi, Skenes, Garrigues, Thomas, Munde, Robb's Gynaecological Technique.

MEDICAL JURISPRUDENCE—Tyler, Ordronaux, Beck.

1899/1900

Claude Ryder Wellington,	Diagnosis.
Clarendon Morton Whitney,	Post Partum Hemorrhage.
Albert Isaiah York,	Appendicitis.

ANNOUNCEMENT.

THE MEDICAL SCHOOL OF MAINE, by an act of the Legislature is placed under the superintendence and direction of the Board of Trustees and Overseers of Bowdoin College. By their joint authority all the degrees of the M. D. are conferred.

The 79th Course of Lectures will begin January 5th, 1899, and continue twenty-four weeks, ending June 21. The introductory lecture will be delivered at 3 o'clock P. M. by Prof. Chas. A. Ring.

MEANS OF INSTRUCTION.

The Anatomical Museum is supplied with a valuable collection of casts, models, and dry and wet specimens which are constantly used in the anatomical and other exercises.

The Chemical Department embraces every article of apparatus essential to complete illustration of the principles of Chemistry.

The laboratories in the Mary F. S. Searles Science Building furnish unsurpassed advantages for special courses in analytical chemistry, urinary analysis and toxicology. These courses are compulsory. They will be entered upon immediately after the closing work in the dissecting room.

The lectures in Physiology are illustrated by experiments.

Prof. Charles D. Smith will continue his instruction in a short course of lectures upon Public Hygiene.

Prof. A. R. Moulton of the Staff of the Pennsylvania Hospital for the Insane, will give a short course upon Mental Diseases.

Instruction in Normal and Pathological Histology is afforded without extra charge. The school provides a large number of microscopes for its histological and pathological laboratories, but students owning microscopes will find it advantageous to bring them.

Excellent facilties will be afforded for practical work in Bacteriology.

Before coming to the School students can do much to equip themselves for appreciation of human anatomy by making systematic dissections of some lower animals ; and to this end they are earnestly advised to follow faithfully the directions prescribed in

"Physiology Practicums," which will be sent post-paid for one dollar by the author, Prof. B. G. Wilder, Ithaca, N. Y. Admirable books in the same line are Wilder and Gage's, Anatomical Technology, Foster and Langley's Practical Physiology, and Huxley and Martin's Biology.

The anatomical law furnishes an abundance of material, which is supplied to students at cost.

The library of the Medical School containing 3700 volumes, has been combined with that of the College, which numbers nearly 60,000 volumes. Both collections are under the same administration and are at the service of the medical students. The more recently published medical works and current numbers of professional journals are kept in a separate room in the main library building for their especial use. It is not the policy of the School to furnish text books through its library, nor to buy largely in medical literature; yet, by the means of the catalogue of the Library of the Surgeon General's Office and the system of inter-library loans, the librarian is able to procure for use in serious investigation almost any book that may be desired.

CLINICS.

The Surgical Clinic will be held every Saturday morning, beginning at quarter past eight o'clock and closing at quarter past eleven.

Prof. W. B. Moulton will give clinical instruction in disease of the Ear and Eye.

The Medical clinic will be held every Thursday morning, beginning at quarter past eleven o'clock and closing at quarter past twelve.

No Medical Cases will be received on Saturdays, and no Surgical Cases on Thursdays.

All examinations in the presence of the Class are made without charge. All surgical operations are gratuitously performed.

TERMS OF ADMISSION AND FEES.

It is desired that a literal interpretation shall be placed upon the stated requirements of the candidates for Matriculation, as hitherto there have been not infrequent examples of those who inquire if other conditions than those named will not serve in lieu of

the examination. The same consideration is asked for the explicit conditions named as regulating the prepayment in cash of fees.

Candidates for Matriculation will be required to give evidence that they possess a good English education, including a knowledge of English Composition, Natural Philosophy, Mathematics, and such a knowledge of Latin as is embraced in the ability to read at sight exercises similar to those found in Harkness' Latin Reader. In preparing for the examination in natural philosophy or physics students should study some standard text book such as Gage's Elements of Physics, Trowbridge's "The New Physics," Dolbears, "First Principles of Natural Philosophy" "Snery's Elementary Physics." They will be expected to know the meaning of such terms as matter, force, energy, mass, volume, potential, kinetic, etc. They should know the general laws of motion, falling bodies, friction, gravitation, flow of liquids, pressure of the air, also the construction and use of thermometers and barometers, and the units of heat and work. In reference to sound, heat, light and electricity, they should know the elementary facts, especially how they are produced, how they are transmitted, reflected, etc., which will involve a study of wave motions in different media. It is difficult to get a proper knowledge of these facts without experimental work, and it is expected that such work will be done.

The chemical knowledge required is similar in kind to the physical, students should have performed the common experiments given in such elementary text books as Remsen's or Storer and Lindsay. It is desirable also that they have had a course in simple qualitative analysis. The chemical courses in the Medical School are arranged on the supposition that elementary chemistry has been practically studied in the preparatory schools.

The requirements in Mathematics include arithmetic, elementary algebra and elementary geometry.

Those who are graduates of Colleges, Normal Schools, High Schools, or have passed the entrance examination to any recognized College, on presentation of their diplomas or matriculation tickets, will be exempt from examination, providing that their previous studies have included Latin and Chemistry to an extent not less than herein prescribed. All without exception who have not such diplomas or tickets will be required to pass the entrance examination. The entrance examination for the first year will begin at nine o'clock Thursday morning, January 5th.

The Fees for admission to the several courses of Lectures, PAYABLE STRICTLY IN ADVANCE, AND BY CASH ONLY, are $78.00 each for first and second courses, and $50.00 for the third course. Matriculation Fee payable each term, $5.00.

Pupils who have attended three full courses of Medical Lectures two of which have been in this school, are admitted to all subsequent courses without payment of any Lecture Fees.

Students who have attended two or more full courses at other regular Medical Institutions, are required to pay $50.00 for admission to their first course of Lectures in this School, in addition to the Matriculation Fee.

A fee of five dollars shall be paid for final examination in each department in which a student presents himself for examination previously to the payment of his diploma fee.

The payment of five dollars includes the cost of examinations of first and second years in Anatomy, Physiology and Chemistry, and hereafter will be paid in full before the examinations of the first year.

The fees charged in Chemistry cover the cost of materials used in the laboratory courses and amount to about $2.50 per year.

If a student fails to pass the examination in a given department in one year, he may be examined in a subsequent year in the same branch on payment of a fee of three dollars.

The total amount paid by a student in examination fees at FIVE DOLLARS each shall be credited on his diploma fee.

The graduation fee, (which is not returnable,) including the diploma, is $25.00.

NO STUDENT WILL BE ALLOWED TO ATTEND ANY COURSE OF LECTURES IN THIS SCHOOL WITHOUT THE CERTIFICATE OF THE DEAN. Members of the Medical Profession are cordially invited to attend the Lectures at any time.

Graduates of other schools, who have been engaged three years in the regular practice of medicine, may receive a general ticket upon presentation of their diplomas and payment of the Matriculation Fee. Graduates of other schools are not eligible for a degree from this school without attendance upon a full course of lectures immediately preceeding the examination for such a degree.

Students are expected to remain until the close of the term.

EXAMINATIONS.

Students and particularly candidates for graduation will be examined at least twice each week in each department by its Professor.

The following regulations are provided in the departments of Anatomy, Physiology, Chemistry and Obstetrics, these regulations not applying in whole to those who have previousiy attended two or more courses of lectures,

ANATOMY.

At the end of their first year in the school students will be examined in histology, the anatomy of the skeleton and the viscera.

At the end of the second year students will be examined in the remainder of descriptive anatomy and topographical anatomy. Two parts must have been satisfactorily dissected and demonstrated before admission to the second year examination and two full years of medical study completed. A part of the hours previously occupied with lectures will be devoted to text book recitations.

On each Thursday morning as for the past several years the Demonstrator of Anatomy will conduct two hours of recitation for the first year students. Attendance upon these recitations is obligatory.

PHYSIOLOGY.

At the end of the first year of study every student shall be examined in Physiology upon the functions of nutrition and reproduction, and if he presents a certificate of having completed two full years of medical study or having pursued approved courses in this branch in a reputable college or technical school he may also be examined upon the functions of relation.

At the end of the second year every student shall be examined upon the functions of relation unless he shall have passed the entire examination at the end of the first year.

A portion of the hours in this department also will be devoted to text book recitations from Blakiston's edition of Kirkes's Physiology.

CHEMISTRY,

The chemical course extends through two years. The first year is given to the chemistry of inorganic substances used in medicine, with preparation of typical ones in the laboratory, and general organic chemistry.

In the second year, urinary analysis and diagnosis, chemical and microscopical are taken up, together with advanced organic chemistry. These courses are given in the finely equipped laboratories of the Searles Science Building, where students have facilities second to none in the United States.

At the end of the first year each student shall be examined upon the chemistry of the first year, if he presents a certificate of having completed two full years of medical study or of having pursued approved courses in chemistry in a reputable college or technical school, he may also be examined in the chemistry of the second year.

At the end of the second year of study each student shall be examined upon the chemical study of the second year unless he shall have passed the entire chemical examination of the first year.

A student who has pursued approved courses in chemistry in a reputable college or technical school may pass an examination on the chemistry of the first year at the beginning of the course.

OBSTETRICS.

Any student may also present himself for final examination in Obstetrics at the regularly appointed time for examination, provided he previously presents to the Dean satisfactory evidence that, at the close of the current term, he shall have completed at least two years of actual study and have attended two courses of Lectures, the second of which must have been in this School. Recitations from text book will occupy a portion of the hours previously devoted to lectures.

Students will receive from the Dean of the faculty certificates of successful passing of final examinations in Anatomy, Physiology, Chemistry and Obstetrics.

Students failing to pass the examination in Anatomy, Physiology and Chemistry will be granted a re-examination at the beginning of the succeeding term, but failure upon that occasion will compel a repetition of the first year's work.

At the begining of the third year a re-examination also will be

granted those who fail in the examination of the second year—if failure again results in any or all of these departments it will prevent one from entering the graduating class. These re-examinations will be held at 8.30 o'clock Thursday morning, January 5th, and Friday morning January 27 at the same hour. All who present themselves for re-examination at times other than those just specified will be required to pay $5.00 in addition to the regular fee and this amount will not be deducted from the diploma fee.

The examinations for the degree of Doctor of Medicine are held at the close of the course of Lectures. Degrees will be conferred upon Wednesday morning, June 21st, after the usual graduating exercises.

GRADUATIONS.

The candidates must be twenty-one years of age, and must have devoted three years to their professional studies under the direction of a regular Practitioner of Medicine. They must have attended three full courses of Lectures in some regular, incorporated Medical Institution. Each of these courses must have been taken in a different calendar year, and the last course previous to examination must have been in this School. They must deposit with the Dean of the Faculty satisfactory certificates of good moral character and of having pursued their medical studies for the required term. They must also pass a satisfactory written and oral examination in Anatomy, Physiology, Chemistry, Pathology and Practice, Surgery, Materia Medica, Obstetrics, Diseases of Women, Diseases of Children, Medical Jurisprudence. They must also present a Thesis on some medical subject, a fair copy of which must be deposited with the Dean of the Faculty at least ten days before the commencement of the examination at the close of the Lectures. These copies are preserved in the Medical library.

In accordance with a recent vote of the faculty it is hereby announced that in 1900 and thereafter, four years of medical study will be required of all candidates for graduation.

Students on arriving should call at once at the office of the college to enter their names, present their certificates and purchase their tickets. They can also obtain there all necessary information in regard to boarding houses.

Price of board from $3.00 to $5.00 per week.

By order of the Faculty.

ALFRED MITCHELL, M. D., Dean.

Brunswick, July 1898.

TEXT BOOKS.

ANATOMY — Gerrish, Gray. For the Dissecting Room Weisse, Ellis, Heath or Holden.

CHEMISTRY — For general reference, Simon, Bartley, Pellew. For reference in Urinary analysis, Purdy, Black, Tyson. For use in laboratory, Whipple.

PHYSIOLOGY — For recitation work Blakiston's edition of Kirkes. For reference, Landois and Stirling, Foster, Dalton, the American Text Book of Physiology by Howell.

PUBLIC HYGIENE — For reference, Coplin and Bevan, Rohe, Parke's Practical Hygiene.

MATERIA MEDICA AND THERAPEUTICS—Hare, White & Wilcox, H. C. Wood, Butler.

PRACTICE OF MEDICINE—Tyson, Anders, Osler, Wood & Fitz. American Year Book of Medicine and Surgery.

BACTERIOLOGY—Abbott, Manual of Bacteriology, Muir, and Richie.

PATHOLOGY—Ziegler's Text Book, Pathological Technique, Mallory and Wright.

PHYSICAL DIAGNOSIS—Tyson, DaCosta, Page.

DISEASES OF CHILDREN — L. Emmett Holt, Taylor & Wells, Rotch, J. Lewis, Smith.

SURGERY—The American Text Book of Surgery last edition, DaCosta's Modern Surgery, Dennis System of Surgery, Park System of Surgery, Warren's Surgical Pathology and Therapeutics.

MIDWIFERY—Parvin, Lusk, Playfair. Manuals, Dorland's and Fothergill's. For reference, American Text Book of Obstetrics.

DISEASES OF WOMEN — Penrose, Garrigues, Pozzi, (2 vols.), Kelly (2 vols.), Robb's Gynaecological Technique.

MEDICAL JURISPRUDENCE—Taylor with Bell's Notes, Ewell.

DISEASES OF THE EYE — Nettleship, Swanzay, DeSchweinity.

PROPOSED BUILDINGS OF THE MEDICAL SCHOOL OF MAINE.

FACULTY.

REV. WILLIAM DeWITT HYDE, D. D.,
PRESIDENT.

HON. JOSHUA LAWRENCE CHAMBERLAIN, LL. D.,
FROM THE BOARD OF TRUSTEES.

DANIEL ARTHUR ROBINSON, A. M., M. D.,
JOHN ADAMS MORRILL, ESQ., A. M.,
FROM THE BOARD OF OVERSEERS.

ALFRED MITCHELL, A. M., M. D.,
DEAN, AND PROFESSOR OF PATHOLOGY AND THE PRACTICE OF MEDICINE.

ISRAEL THORNDIKE DANA, A. M., M. D.,
PROFESSOR EMERITUS OF PATHOLOGY AND THE PRACTICE OF MEDICINE.

FREDERIC HENRY GERRISH, A. M., M. D.,
PROFESSOR OF ANATOMY.

STEPHEN HOLMES WEEKS, A. M., M. D.,
PROFESSOR OF SURGERY AND CLINICAL SURGERY.

CHARLES OLIVER HUNT, A. M., M. D.,
PROFESSOR OF MATERIA MEDICA AND THERAPEUTICS.

FRANKLIN CLEMENT ROBINSON, A. M.,
PROFESSOR OF CHEMISTRY.

LUCILIUS ALONZO EMERY, LL. D.,
PROFESSOR OF MEDICAL JURISPRUDENCE.

CHARLES DENNISON SMITH, A. M., M. D.,
PROFESSOR OF PHYSIOLOGY AND HYGIENE.

ALBERT ROSCOE MOULTON, M. D.,
PROFESSOR OF MENTAL DISEASES.

WILLIS BRYANT MOULTON, A. M., M. D.,
Clinical Professor of Diseases of the Eye and Ear.

JOHN FRANKLIN THOMPSON, A. M., M. D.,
Professor of Diseases of Women.

CHARLES AUGUSTUS RING, A. M., M. D.,
Professor of Obstetrics.

ADDISON SANFORD THAYER, A. B., M. D.,
Professor of Diseases of Children.

ALFRED KING, A. B., M. D.,
Instructor in, and Demonstrator of, Anatomy.

FRANK NATHANIEL WHITTIER, A. M., M. D.,
Instructor in Pathological Histology and Bacteriology.

HENRY HERBERT BROCK, A. B., M. D.,
Instructor in Surgery.

EDWARD JAMES McDONOUGH, A. B., M. D.,
Instructor in Histology.

GEORGE THOMAS LITTLE, Litt. D.,
Librarian.

JACOB LYMAN HORR, M. D.,
JOHN M. WAKEFIELD, M. D.,
Visitors from the Maine Medical Association.

Daniel Webster Wentworth,	Diphtheria.
William Hilt Young,	Diphtheria.

ANNOUNCEMENT.

The Medical School of Maine, established by the first legislature of the State, was by its charter placed under the control of the Boards of Trustees and Overseers of Bowdoin College, of which institution it is the Medical Department.

Its course of instruction covers four years of six months each. The studies are distributed through the curriculum according to the following schedule:

First Year: Anatomy, Histology, Physiology, Chemistry, Personal Hygiene.

Second Year: Anatomy, Physiology, Chemistry, Pathology, Bacteriology.

Third Year: Internal Medicine, Surgery, Materia Medica and Therapeutics, Obstetrics.

Fourth Year: Internal Medicine, Surgery, Materia Medica and Therapeutics, Medical Jurisprudence, Public Hygiene, Diseases of Women, Diseases of Children, Diseases of the Mind, Diseases of the Skin, Diseases of the Genito-urinary System, Diseases of the Eye, Diseases of the Ear, Diseases of the Nose and Throat.

The course is strictly graded, and all of the required studies of one year must be completed before those of the next succeeding year can be entered upon.

At the end of each year an examination is held in the studies of that year, and the successful student receives a certificate from the Dean testifying to his passage. Those who prefer to defer their examination and those who have failed at the close of the school-year, are allowed an examination at the beginning of the next year. If, for any sufficient cause, a student is unable to be present at the time appointed for this second examination, he may be examined three weeks after the beginning of the year. Failure to pass in the studies of the final year will necessitate a repetition of the work of that year.

To be eligible for examination in the studies of the first year the student must have completed a full year of professional work and show documentary evidence to this effect; and corresponding requirements must be fulfilled before admission to second-year and third-year examinations.

An examination which is not completed receives no consideration.

The students of the first and second years are instructed at Brunswick, where the school has been situated since its foundation in 1820, and where the facilities are excellent for imparting a knowledge of the primary branches. The third-year and fourth-year classes will hereafter be taught in Portland on account of the superior clinical advantages afforded in that city. The first of the two buildings designed for the use of the School will be ready for occupancy in season for the coming term, and will furnish ample accommodations for the advanced classes. As soon as the second and larger building is completed the whole school will be located in Portland. The projected buildings, represented in the accompanying illustration, will be situated on Chadwick Street next to the Sebago Reservoir, and close to the Maine General Hospital, in which institution nearly all of the teachers in the School are medical or surgical officers, and the Directors of which are in full sympathy with the purposes of the Faculty.*

While the Maine General Hospital (a view of which is given on the last page of the cover) is the chief source of supply of clinical material for the School, Portland has a number of other institutions, which will contribute to the bedside instruction of the students; and the various teachers, as opportunity permits, will show individual pupils interesting cases in their private practice.

The eightieth annual course will begin on Thursday, the 28th of December, 1899, and will continue twenty-six weeks.

Examinations for *admission to the School* will be held at nine o'clock in the morning of the first day, Thursday, the 28th of December, in Brunswick, for those who desire to enter the first or second years; in Portland at the same hour for those, not previously matriculated, who desire to enter the third year.

Examinations for *advanced standing* will be held at nine o'clock in the morning of Friday, the 29th of December, in Brunswick for those wishing to enter the second year; at nine o'clock in the morning of Saturday, the 30th of December, in Portland, for those who wish to enter the third year.

No exercises will be held on Monday, the first day of January, as it is a legal holiday.

The formal introductory lecture will be delivered by Professor Ring, in Memorial Hall, Brunswick, at three o'clock in the afternoon of Tuesday, the second of January, 1900.

The systematic courses of instruction will begin on Wednesday morning, the third of January.

*The electric cars (Spring Street line—blue) run on Vaughan Street, which is but one block from the School; and free transfers may be had from the Congress Street line (green) and the Middle Street line (red), so that one can easily reach the School from either end of the city, and from the Union, Grand Trunk, and Rochester railway stations.

On arriving in Brunswick students should apply at the office of the Dean in the medical building, enter their names, receive directions concerning their examinations, if any are needed, pay their fees, and be advised as to boarding places.

In Portland they should apply at the office in the medical building for the same purposes. Dr. Charles O. Hunt will act as deputy dean.

EXPENSES.

For Instruction :

In each of the required four years $100. Exception will be made in the case of those who have previously matriculated. They will be required to pay only those fees which were in vogue on their admission to the School, namely, $78 for their second course, and $50 for their third course.

For Examinations :

Payable at the end of the first year—

In Anatomy,	$5.
In Physiology,	$5.
In Chemistry,	$5.

Payable at the close of the term of instruction in Obstetrics, for examination in this branch, $5.

These four fees are credited on the diploma-or graduation-fee.

For every re-examination in any of the above studies, $3.

This fee is not credited on the diploma-fee.

For examination or re-examination in any branch at a time not regularly appointed the student shall pay a fee of $5 in addition to the prescribed fee for that examination.

Miscellaneous :

The Matriculation Fee of $5 is required of every student each year.

For materials used in the chemical-laboratory courses, about $2.50 per year.

For materials used in the bacteriological laboratory, about $2.

For anatomical material, its cost.

For graduation fee (not returnable), including the parchment diploma, $25. This will have been nearly paid in the examination-fees in the previous years.

Graduates of other schools, who have been engaged three years in the regular practice of medicine, may receive a general ticket upon presentation of their diplomas and payment of the Matriculation Fee. Graduates of other schools are not eligible for a degree from this school without attendance upon a full course of instruction immediately preceding the examination for such a degree.

All fees must be PAID IN CASH and STRICTLY IN ADVANCE.

Board and lodging cost from $3 to $5 a week.

REQUIREMENTS FOR ADMISSION.

Applicants for admission will be required to give evidence that they possess a good English education, and unless they present diplomas or entrance-tickets as provided below they must pass examinations in the following studies:

English :—Spelling, writing, construction of sentences, and English grammar in general.

Arithmetic :—As represented in the larger common-school text-books on the subject.

Algebra :—Including addition, subtraction, multiplication, division, factoring, and simple equations, as, for example, the first eleven chapters in Wentworth's New School Algebra.

Geometry :—Including at least three books of some standard plane geometry, as Wells's or Wentworth's.

History of the United States :—To the extent afforded in the ordinary school history, such as Montgomery's.

Physics :—As presented in any standard school text-book, such as Gage's Elements of Physics, or Dolbear's Natural Philosophy. This requirement cannot well be met with less than a year's study in some good school, where the illustrative experiments are required to be performed.

Chemistry :—As much as is covered in some standard school chemistry, as Remsen's, or Storer and Lindsay's. As in the case of the Physics, this requirement cannot well be met with less than a year's study in some school provided with a laboratory, where illustrative experiments have been performed by the student. These experiments should include elementary qualitative analysis, and candidates should present note-books giving accounts of experiments performed, which books must be certified by the teacher.

Latin :—Including sight-reading of easy Latin, a knowledge of the construction of Latin sentences, and the reading of some standard Latin author, as Cæsar or Virgil. At least two years should have been spent in the study of Latin in some good school.

Those who are graduates of Colleges, Normal Schools, High Schools, or Academies, or have passed the entrance examination to any recognized College, on presentation of their diplomas or matriculation tickets, will be exempt from examination, provided that their previous studies have included Latin, Chemistry, and Physics to an extent not less than herein prescribed; but, if their previous studies have not included Latin, Chemistry, and Physics to the required extent, they must be examined

upon these branches, and their diplomas or matriculation tickets will exempt them from examination in the other branches. All without exception who have not such diplomas or tickets will be required to pass the entire entrance examination.

Business Colleges are not recognized.

Students from other schools who apply for advanced standing must comply with the requirements for admission to the first year, must give satisfactory evidence that they have completed a course or courses of instruction equivalent in kind and amount to that or those in this School preceding that to which admission is sought, and must pass examinations in all of the branches previously pursued by the class which they wish to enter. Certificates of the passage of examinations in other schools are not accepted in lieu of examinations.

It is desired that a literal interpretation shall be placed upon the stated requirements of the candidates for Matriculation, as hitherto there have been not infrequent examples of those who inquire if other conditions than those named will not serve in lieu of the examination. The same consideration is asked for the explicit conditions named as regulating the prepayment of fees in cash.

GRADUATION.

A candidate must be twenty-one years of age, and must have devoted to his professional studies four years, including a course of instruction in each of these years in some reputable, regular, incorporated medical institution, and the last course previous to examination must have been in this School. As evidence of his study when not in attendance upon such a school, he must present to the Dean the certificate of a regular and reputable practitioner of medicine. He must present a satisfactory certificate of good moral character from a citizen of the town in which he resides. He must also pass a satisfactory examination in the required studies, previously specified, and present a thesis on some medical subject, a fair copy of which must be handed to the Dean at least ten days before the beginning of the final examinations.

The requirement of four years of study and four courses of instruction will not be enforced in the case of those students who were matriculated in this school previously to June, 1899. These will be permitted to graduate on the terms in vogue of late, namely, three years of study, and a course of instruction in each. But all who matriculate after June, 1899, will come within the scope of the new requirements.

The four years above referred to are years of strictly medical study. No allowance is made in the period of study for work not done in an accredited medical school. Time spent in pharmacy, dental, and veterinary institutions, and in preparatory schools and colleges does not entitle a student to examination for advanced standing.

While the faculty fully recognizes the advantage which a student experiences from the possession of an excellent preliminary education, especially if this has been along biological lines, it believes that to reckon such preparatory training as a part of the required term of study would be a plain evasion of the reasonable demand of the best members of the profession for an extension of the medical course from three to four years—a demand based upon the manifest necessity for more time in which to cover the greatly extended field of medical knowledge. To shirk this plain duty would result also in a refusal by some of the state boards of registration to admit to examination the graduates of this School; and the faculty intends that this institution shall be so conducted that the holders of its diploma shall be welcomed in all parts of the country.

METHODS OF INSTRUCTION.

In order to afford to students who contemplate entering the school an idea of the facilities presented by this institution for acquiring a knowledge of the science and art of medicine, a brief statement is here made of the scope of the work in each department and the methods adopted for imparting instruction.

Anatomy.

The course in this branch covers two years. In the early part of the first year the elementary tissues are studied, both in the lecture room and the histological laboratory. Then the viscera (including the cerebro-spinal axis and the organs of the special senses) are taken up in such order as will enable the student to become acquainted with the structure of each organ before its function is treated of by the professor of physiology, this method being the most rational and highly economical of the pupil's time. Synchronously with this work the subjects of osteology and arthrology are pursued. All of these exercises are illustrated by casts, models, fresh and preserved specimens, and free-hand blackboard drawings. Some subjects are treated by lecture, but the recitation method has the more prominent place. Four hours of didactic exercises a week are bestowed on the first-year work, and the afternoons for some weeks are devoted to microscopic work. The school provides a large number of microscopes; but students owning microscopes will find it advantageous to bring them.

The second year in anatomy is devoted to the remainder of systematic anatomy and to relational anatomy. Myology is taken first, and the student must be able to recognize the muscles in the part which he is to dissect before he is allowed to work on the cadaver. Two dissections on different parts are required, and students are encouraged to dissect as much more as is possible. Surface anatomy is illustrated upon the living model, upon which, also, the students are required to

make demonstrations. In the examinations at the close of the year demonstrations upon the dissected subject are a prominent feature.

Before coming to the School students can do much to equip themselves for appreciation of human anatomy by making systematic dissections of some lower animals; and to this end they are earnestly advised to follow faithfully the directions prescribed in "Physiology Practicums," which will be sent post-paid for one dollar by the author, Prof. B. G. Wilder, Ithaca, N. Y. Admirable books in the same line are Wilder and Gage's Anatomical Technology, Foster and Langley's Practical Physiology, and Huxley and Martin's Biology.

The Anatomical Museum, previously well supplied with wet and dry specimens, casts and models in plaster, wax, and papier maché, has recently been enriched by a large importation from Germany, which adds greatly to the means for instruction.

Physiology.

Instruction in this department is conducted with a view to the practical application of the facts of physiology to the needs of the student in his study of the diagnosis and treatment of disease, and demonstrations and experimental teaching are employed as far as they can be made to serve this end.

In the first year the work will be devoted to the functions of nutrition and reproduction; in the second year to the functions of relation. A portion of the hours will be devoted to text-book recitations.

If a student presents a certificate of having completed two full years of medical study or of having pursued approved courses in this branch in a reputable college or technical school, he may be examined at the end of his first year in this School upon the physiological studies of the second year as well as upon those of the first year.

Chemistry.

The chemical course extends through the first two years. In the first year inorganic preparations, toxicology, and the simpler parts of organic chemistry are taken up. Two exercises a week are held of one hour each, except when laboratory work or a quiz is given, when additional time may be taken.

In the second year, the course includes urinary analysis and diagnosis, and continuation of organic chemistry to include carbohydrates, fats and oils, proteids, alkaloids and medicinal substances derived from coal-tar. The time is substantially the same as in the first year.

At the end of each year examinations are held, and the results of these, taken in connection with the laboratory work and quizzes, determine whether the work has been satisfactorily completed or not.

Students who satisfy the professor of chemistry that they have pursued courses of chemical study similar to either of the above may be

examined by him at the beginning of the term, and if the examination is satisfactory they will be excused from attendance upon the courses in question.

The Chemical Department embraces every article of apparatus essential to the complete illustration of the principles of Chemistry.

The laboratories in the Mary F. S. Searles Science-Building furnish unsurpassed advantages for special courses in analytical chemistry, urinary analysis, and toxicology. These courses are compulsory. They will be entered upon immediately after the close of the dissecting season.

Obstetrics.

The instruction in this branch is given by lectures, recitations, and quizzes, illustrated by models, manikins, and actual specimens.

Pathology and the Practice of Medicine.

Instruction will be given by means of lectures, by regular and systematic quizzes upon these lectures, and by charts. Especial attention will be given to the study of methods of physical diagnosis.

A *medical clinic* will be held by the Professor at the Hospital every week, the material being furnished by the visiting physicians from the abundant resources of their wards, and by all members of the faculty as they have cases of interest which can be utilized for the illustration of subjects under treatment in the didactic course. The visiting physicians will hold additional clinics as opportunity occurs. Definite announcements of these exercises will be seasonably made.

Bacteriology and Pathological Histology.

A. Bacteriology.

The course consists of lectures and laboratory work. In the laboratory course each student is required to cultivate upon three media ten varieties of pathogenic bacteria, to make stained microscopical preparations of each variety, and to study with the microscope the living organisms in hanging drop preparations.

Special attention is given to the examination of sputum for tubercle bacilli, to the diagnosis of diphtheria by means of making smears from suspected throats on Löffler's blood-serum mixture, to the technic of the serum diagnosis of typhoid fever, to methods of staining gonorrhœal pus.

B. Pathological Histology.

The course consists of lectures and laboratory work. The first half of the course is devoted to the study of inflammations excited by chemical and bacterial causes. It includes the pathological histology of

tuberculosis, diphtheria, pneumonia, etc. The second half of the course is devoted mainly to the study of tumors.

In the laboratory course each student is required to make stained microscopical preparations illustrating the disease-processes studied. These preparations become the property of the student and are preserved for reference. Many of these preparations are made from tissues obtained at the surgical clinics and thus show the pathology of cases previously observed.

Surgery.

The entire field of surgery is covered by the instruction in this department, excepting those portions coming under the heads of gynæcology, ophthalmology, and otology. The didactic lectures are supplemented by ample bedside teaching. A clinic will be held once a week at the Hospital, the visiting surgeons of which place at the disposal of the professor whatever material in their wards he desires for illustration of the topics which he has in hand.

In addition to these systematic clinics students have the privilege of witnessing operations almost every day at the Hospital, and these will be explained and made as useful as possible by the surgeons. Opportunity will be given to observe the after-treatment and subsequent progress of the cases, sections of the class being permitted to visit the wards under the guidance of the surgeons on duty.

Minor and operative surgery receive due attention, and the most practical character is given to the instruction, the students being required to apply bandages and other dressings, and performing operations upon the cadaver under the direct supervision of the instructor.

Materia Medica and Therapeutics.

The instruction in Materia Medica and Therapeutics will be given by lectures and quizzes.

A practical exercise in prescription writing will be given every week, by which the student will be taught not only to write the prescription correctly, but to prescribe correctly for given conditions.

Medical Jurisprudence.

The instruction in Medical Jurisprudence will be directed mainly to an exposition of the legal duties and responsibilities of physicians and surgeons to their patients, and also to their character and position as medical expert witnesses in Courts of Justice. Practical suggestions will be given for guidance in both respects.

Gynæcology.

Didactic and clinical instruction will be combined in the department of Diseases of Women.

Abundant opportunities will be given to examine patients whose diseases come within the scope of this department. The various methods of diagnosis and treatment will be demonstrated.

Diseases of Children.

The instruction in this department will be given chiefly by lectures and recitations, and will also include clinical exercises and demonstrations.

Mental Diseases.

The professor of this department is chief medical officer of the Pennsylvania Hospital for the Insane. Especial efforts are made to instruct the students in the early recognition of insanity, with a view to the institution of treatment at the time when it is most productive of good results.

Ophthalmology and Otology.

A weekly clinic in diseases of the eye and ear will be held at the Hospital. The various diseases will be described as cases illustrating them are available for demonstration, operations will be performed when required, and other treatment applied as may be necessary.

Public Hygiene.

Instruction is given by the President of the State Board of Health by lectures upon the principles of Public Sanitation, considering the source and character of public water supplies and the collection and disposal of waste, with especial reference to preventable diseases.

Several hours are devoted to sanitary legislation, and the relations and obligations of the practising physician to public and health-boards, in the management of infectious diseases.

THE LIBRARY.

The library of the Medical School, containing 3700 volumes, has been combined with that of the College, which numbers nearly 60,000 volumes. Both collections are under the same administration and are at the service of the medical students. The more recently published medical works and current numbers of professional journals are kept in a separate room in the main library building for their especial use. It is not the policy of the School to furnish text-books through its library, or to buy largely in medical literature; yet, by means of the catalogue of the Library of the Surgeon General's Office and the system of inter-library loans, the librarian is able to procure for use in serious investigation almost any book that may be desired.

TEXT-BOOKS.

ANATOMY—Gerrish. For reference, Quain.

PHYSIOLOGY—For recitation work, Blakiston's edition of Kirkes. For reference, Landois and Stirling, Foster, Dalton, the American Text-Book of Physiology by Howell.

CHEMISTRY—For general reference, Simon, Bartley, Pellew. For reference in urinary analysis, Purdy, Black, Tyson. For use in laboratory, Robinson's Qualitative Chemical Analysis.

PUBLIC HYGIENE—For reference, Coplin and Bevan, Rohe, Parke's Practical Hygiene.

MATERIA MEDICA AND THERAPEUTICS—Hare, White & Wilcox, H. C. Wood, Butler.

PRACTICE OF MEDICINE—Osler, Tyson, Anders, Wood & Fitz. Practical Diagnosis, Hare.

BACTERIOLOGY—Abbott's Manual of Bacteriology, Muir, and Richie.

PATHOLOGY—Ziegler's Text-Book; Pathological Technique, Mallory and Wright.

PHYSICAL DIAGNOSIS—Tyson, DaCosta, Page.

DISEASES OF CHILDREN—Holt, Rotch, Starr, Sachs.

SURGERY—The American Text-Book of Surgery, last edition, DaCosta's Modern Surgery, Dennis's System of Surgery, Park's Treatise on Surgery, Warren's Surgical Pathology and Therapeutics.

OBSTETRICS—American Text-Book of Obstetrics, Hirst, Jewett, Dorland.

DISEASES OF WOMEN—Kelly (2 vols.), Pozzi, (2 vols.), E. C. Dudley, Robb's Gynæcological Technique, Garrigues.

MEDICAL JURISPRUDENCE—Taylor with Bell's Notes, Ewell.

DISEASES OF THE EYE—Nettleship, Swanzay, DeSchweinitz.

CALENDAR.

1899.

28, December, Thursday. Entrance Examination: for first-and second-year students, at nine o'clock, in Brunswick; third-year students, nine o'clock, in Portland.

29, December, Friday. Examination for advanced standing, for second year, nine o'clock, in Brunswick.

30, December, Saturday. Examination for advanced standing, for third year, nine o'clock, in Portland.

1900.

1, January, Monday. New Year. Holiday. No exercises.

2, January, Tuesday. Introductory Lecture, Memorial Hall, Brunswick, at three o'clock.

22, February, Thursday. Washington's Birthday. Holiday. No exercises.

April. From noon of the Wednesday immediately preceding Fast Day to the morning of the next Tuesday, Recess.

30, May, Wednesday. Memorial Day. Holiday. No exercises.

18 to 26, June, Monday to a week from the next Tuesday, both inclusive. Examinations.

27, June, Wednesday. Graduating Exercises at nine o'clock, in Memorial Hall, Brunswick.

28, June, Thursday. Bowdoin College Commencement.

PROPOSED BUILDING OF THE MEDICAL SCHOOL OF MAINE.

FACULTY.

REV. WILLIAM DeWITT HYDE, D. D.,
PRESIDENT.
No. 85 Federal Street, Brunswick.

HON. WILLIAM LeBARON PUTNAM, LL. D.,
FROM THE BOARD OF TRUSTEES.

DANIEL ARTHUR ROBINSON, A. M., M. D.,
GEORGE FOSTER CAREY, A. B.,
FROM THE BOARD OF OVERSEERS.

ALFRED MITCHELL, A. M., M. D.,
DEAN, AND PROFESSOR OF PATHOLOGY AND THE PRACTICE OF MEDICINE,
163 Main Street, Brunswick.

ISRAEL THORNDIKE DANA, A. M., M. D.,
PROFESSOR EMERITUS OF PATHOLOGY AND THE PRACTICE OF MEDICINE.
35 West Street, Portland.

FREDERIC HENRY GERRISH, A. M., M. D.,
PROFESSOR OF ANATOMY.
675 Congress Street, Portland.

STEPHEN HOLMES WEEKS, A. M., M. D.,
PROFESSOR OF SURGERY AND CLINICAL SURGERY.
662 Congress Street, Portland.

CHARLES OLIVER HUNT, A. M., M. D.,
PROFESSOR OF MATERIA MEDICA AND THERAPEUTICS,
Maine General Hospital, Portland.

FRANKLIN CLEMENT ROBINSON, A. M.,
PROFESSOR OF CHEMISTRY.
214 Main Street, Brunswick.

LUCILIUS ALONZO EMERY, LL. D.,
PROFESSOR OF MEDICAL JURISPRUDENCE.
Ellsworth.

CHARLES DENNISON SMITH, A. M., M. D.,
PROFESSOR OF PHYSIOLOGY AND HYGIENE.
126 Free Street, Portland.

Harry Coulter Todd, A. B.,	Medical Jurisprudence.
Virgil Connor Totman, A. M.,	Anæsthesia.

ANNOUNCEMENT.

The Medical School of Maine, established by the first legislature of the State, was by its charter placed under the control of the Boards of Trustees and Overseers of Bowdoin College, of which institution it is the Medical Department.

Its course of instruction covers four years of six months each. The studies are distributed through the curriculum according to the following schedule:

First Year: Anatomy, Histology, Physiology, Chemistry, Personal Hygiene.

Second Year: Anatomy, Physiology, Chemistry, Pathology, Bacteriology.

Third Year: Internal Medicine, Surgery, Materia Medica and Therapeutics, Obstetrics.

Fourth Year: Internal Medicine, Surgery, Materia Medica and Therapeutics, Medical Jurisprudence, Public Hygiene, Diseases of Women, Diseases of Children, Diseases of the Mind, Diseases of the Skin, Diseases of the Genito-urinary System, Diseases of the Eye, Diseases of the Ear, Diseases of the Nose and Throat.

The course is strictly graded, and all of the required studies of one year must be completed before those of the next succeeding year can be entered upon.

At the end of each year an examination is held in the studies of that year, and the successful student receives a certificate from the Dean testifying to his passage. Those who prefer to defer their examination and those who have failed at the close of the school-year, are allowed one examination and one only at the begining of the next

year. If, for any sufficient cause, a student is unable to be present at the time appointed for this second examination, he may be examined three weeks after the begining of the year. Failure to pass in the studies of the final year will necessitate a repetition of the work of that year.

To be eligible for examination in the studies of the first year the student must have completed a full year of professional work and show documentary evidence to this effect; and corresponding requirements must be fulfilled before admission to second-year and third-year examinations.

An examination which is not completed receives no consideration.

The students of the first and second years are instructed at Brunswick, where the school has been situated since its foundation in 1820, and where the facilities are excellent for imparting a knowledge of the primary branches. The third year and fourth year classes will hereafter be taught in Portland on account of the superior clinical advantages afforded in that city. The first of the two buildings designed for the use of the school and occupied by it during the last course furnishes ample accomodations for the advanced classes. As soon as the second and larger building represented in the accompanying illustration is completed the whole school will be moved to Portland. The location of these buildings is on Chadwick Street next to the Maine General Hospital, in which institution nearly all the teachers in the School are medical or surgical officers and the Directors of which are in full sympathy with the purposes of the Faculty.*

While the Maine General Hospital (a view of which is given on the last page of the cover) is the chief source

*The electric cars (Spring Street line—blue) run on Vaughn Street, which is but one block from the School; and free transfers may be had from the Congress Street line (green) and the Middle Street line (red), so that one can easily reach the School from either end of the city, and from the Union, Grand Trunk and Rochester railway stations.

of supply of clinical material for the School, Portland has a number of other institutions, which will contribute to the bedside instruction of the students; and the various teachers, as opportunity permits, will show individual pupils interesting cases in their private practice.

The eighty-first annual course will begin on Thursday, the 27th of December, 1900 and will continue twenty-six weeks.

Examinations for *admission to the School* will be held at nine o'clock in the morning of the first day, Thursday, the 27th of December, in Brunswick.

Re-examinations, deferred examinations, and examinations for advanced standing for those who desire to enter the second year will be held in Brunswick on Friday, the 28th of December. Examinations in anatomy at nine o'clock A. M., in physiology at two o'clock P. M.

Re-examination, deferred examinations and examinations for advanced standing for those wishing to enter the third year will be held in Portland on Saturday December 29th. Examinations in anatomy at nine o'clock A. M., in physiology at two o'clock P. M.

No exercises will be held on Tuesday, the first day of January as it is a legal holiday.

The formal introductory lecture will be delivered by Professor Weeks in Memorial Hall, Brunswick, at three o'clock in the afternoon of Monday, the thirty-first of December.

The systematic courses of instruction will begin on Wednesday morning the second of January.

On arriving in Brunswick students should apply at the office of the Dean in the medical building, enter their names, receive directions concerning their examinations, if any are needed, pay their fees, and be advised as to boarding places.

In Portland they should apply at the office in the medical building for the same purposes. Dr. Charles O. Hunt will act as deputy dean.

EXPENSES.

For Instruction:

In each of the required four years $100. Exception will be made in the case of those who matriculated prior to 1899. They will be required to pay only those fees which were in vogue on their admission to this school, namely, $78 for their second course, and $50 for their third course.

For Examinations:

Payable at the end of the first year—

In Anatomy,	$5.
In Physiology,	$5.
In Chemistry,	$5.

Payable at the close of the term of instruction in Obstetrics, for examination in this branch. $5.

These four fees are credited on the diploma-or-graduation-fee.

For every re-examination in any of the above studies, $3.

This fee is not credited on the diploma-fee.

For examination or re-examination in any branch at a time not regularly appointed the student shall pay a fee of $5 in addition to the prescribed fee for that examination.

Students who fail to pass the examinations at or near to the beginning of the course cannot be examined again until the end of the course.

Miscellaneous:

The Matriculation Fee of $5 is required of every student each year.

For materials used in the chemical-laboratory courses, about $2.50 per year.

For materials used in the bacteriological laboratory about $2.

For anatomical material, its cost.

For graduation fee (not returnable), including the parchment diploma, $25. This will have been nearly paid in the examination-fees in the previous years.

Graduates of other schools, who have been engaged three years in the regular practice of medicine, may receive a general ticket upon presentation of their diplomas and payment of the Matriculation Fee. Graduates of other schools are not eligible for a degree from this school without attendance upon a full course of instruction immediately preceding the examination for such a degree.

All fees must be PAID IN CASH and STRICTLY IN ADVANCE.

Board and lodging cost from $3 to $5 a week.

REQUIREMENTS FOR ADMISSION.

Applicants for admission will be required to give evidence that they posess a good English education, and unless they present diplomas or entrance-tickets as provided below they must pass examinations in the following studies:

English:—Spelling, writing, construction of sentences, and English grammar in general.

Arithmetic:—As represented in the larger common-school text-books on the subject.

Algebra:—Including addition, substraction, multiplication division, factoring, and simple equations, as, for example, the first eleven chapters in Wentworth's New School Algebra.

Geometry:—Including at least three books of some standard plane geometry, as Wells' or Wentworth's.

History of the United States:—To the extent afforded in the ordinary school history, such as Montgomerey's.

Physics:—As presented in any standard school text-book such as Gage's Elements of Physics, or Dolbear's Natural Philosophy. This requirement cannot well be met with less than a year study in some good school

where the illustrative experiments are required to be performed.

Chemistry:—As much as is covered in some standard school chemistry, as Remsen's, or Storer and Lindsay's. As in the case of the Physics, this requirement cannot well be met with less than a year's study in some school provided with a laboratory, where illustrative experiments have been performed by the student. These experiments should include elementary qualitative analysis, and candidates should present note-books giving accounts of experiments performed, which books must be certified by the teacher.

Latin:—Including sight-reading of easy Latin, a knowledge of the construction of Latin sentences, and the reading of some standard Latin author, as Cæsar or Virgil. At least two years should have been spent in the study of Latin in some good school.

Those who are graduates of Colleges, Normal Schools, High Schools, or Academies, or have passed the entrance examination to any recognized College, on presentation of their diplomas or matriculation tickets, will be exempt from examination, provided that their previous studies have included Latin, Chemistry, and Physics to an extent not less than herein prescribed; but if their previous studies have not included Latin, Chemistry, and Physics to the required extent, they must be examined upon these branches and their diplomas or matriculation tickets will exempt them from examination in the other branches. All without exception who have not such diplomas or tickets will be required to pass the entire entrance examination.

Business Colleges are not recognized.

Students from other schools who apply for advanced standing must comply with the requirements for admission to the first year, must give satisfactory evidence that they have completed a course or courses of instruction equivalent in kind and amount to that or those in this

school preceding that to which admission is sought, and must pass examinations in all of the branches previously pursued by the class which they wish to enter. Certificates of the passage of examinations in other schools are not accepted in lieu of examinations.

It is desired that a literal interpretation shall be placed upon the stated requirements of the candidates for Matriculation, as hitherto there have been not infrequent examples of those who inquire if other conditions than those named will not serve in lieu of the examination. The same consideration is asked for the explicit condition named as regulating the prepayment of fees in cash.

GRADUATION.

A candidate must be twenty-one years of age, and must have devoted to his professional studies four years, including a course of instruction in each of these years in some reputable, regular, incorporated medical institution, and the last course previous to examination must have been in this School. As evidence of his study when not in attendance upon such a school, he must present to the Dean the certificate of a regular and reputable practitioner of medicine. He must present a satisfactory certificate of good moral character from a citizen of the town in which he resides. He must also pass a satisfactory examination in the required studies, previously specified, and present a thesis on some medical subject, a fair copy of which must be handed to the Dean at least ten days before the beginning of the final examinations.

The requirement of four years of study and four courses of instruction will not be enforced in the case of those students who were matriculated in this school previously to June, 1899. These will be permitted to graduate on the terms in vogue of late, namely, three years of study, and a course of instruction in each. But all who matriculate after June, 1899, will come within the scope of the new requirements.

Time spent in pharmacy, dental, and veterinary institutions, and in preparatory schools does not entitle a student to examination for advanced standing.

A student who has received the degree of A. B., B. S. or any similar degree after four years of study in a recognized college or technical school if his studies have included a satisfactory amount of chemistry, physics and biology may be admitted as a second year student, but when so admitted he shall not gain third year standing until he has passed satisfactory examinations in the studies of the first and second year.

METHODS OF INSTRUCTION.

In order to afford to students who contemplate entering the school an idea of the facilties presented by this institution for acquiring a knowledge of the science and art of medicine, a brief statement is here made of the scope of the work in each department and the methods adopted for imparting instruction.

ANATOMY.

The course in this branch covers two years. In the early part of the first year the elementry tissues are studied, both in the lecture room and in the histological laboratory. Then the viscera (including the cerebro-spinal axis and the organs of special senses) are taken up in such order as will enable the student to become accquainted with the structure of each organ before its function is treated of by the professor of physiology, this method being the most rational and highly economical of the pupil's time. Synchronously with this work the subjects of osteology and arthrology are pursued. All of these exercises are illustrated by casts, models, fresh and preserved specimens, and freehand blackboard drawings. Some subjects are treated by lecture, but the recitation method has the more prominent place. Four hours of didactic exercises a week are bestowed on the first-year work, and the afternoons for

some weeks are devoted to microscopic work. The school provides a large number of microscopes; but students owning microscopes will find it advantageous to bring them.

The second year in anatomy is devoted to the remainder of systematic anatomy and to relational anatomy. Myology is taken first, and the student must be able to recognize the muscles in the part which he is to dissect before he is allowed to work on the cadaver. Two dissections on different parts are required and students are encouraged to dissect as much more as is possible. Surface anatomy is illustrated upon the living model, upon which, also, the students are required to make demonstrations. In the examinations at the close of the year demonstrations upon the dissected subjects are a prominent feature.

Before coming to the School students can do much to equip themselves for appreciation of human anatomy by making systematic dissections of some lower animals; and to this end they are earnestly advised to follow faithfully the directions prescribed in "Physiology Practicums," which will be sent post-paid for one dollar by the author, Prof. B. G. Wilder, Ithaca, N. Y. Admirable books in the same line are Wilder and Gage's Anatomical Technology, Foster and Langley's Practcal Physiology, and Huxley and Martin's Biology.

The Anatomical Museum, previously well supplied with wet and dry specimens, casts and models in plaster, wax, and papier mache, has recently been enriched by a large importation from Germany, which adds greatly to the means for instruction.

PHYSIOLOGY.

Instruction in this department is conducted with a view to the practical application of the facts of physiology to the needs of the student in his study of the diagnosis and treatment of disease, and demonstrations and experimental teaching are employed as far as they can be made to serve this end.

In the first year the work will be devoted to the functions of nutrition and reproduction; in the second year to the functions of relation. A portion of the hours will be devoted to text-book recitations.

If a student presents a certificate of having completed two full years of medical study or of having pursued approved courses in this branch in a reputable college or technical school, he may be examined at the end of his first year in this School upon the physiological studies of the second year as well as upon those of the first year.

CHEMISTY.

The chemical course extends through the first two years. In the first year inorganic preparations, toxicology and the simpler parts of organic chemistry are taken up. Two exercises a week are held of one hour each, except when laboratory work or a quiz is given, when additional time may be taken.

In the second year, the course includes urinary analysis and diagnosis, and continuation of organic chemistry to include carbohydrates, fats and oils, proteids, alkaloids and medicinal substances derived from coal-tar. The time is substantially the same as in the first year.

At the end of each year examinations are held, and the results of these, taken in connection with the laboratory work and quizzes, determine whether the work has been satisfactorily completed or not.

Students who satisfy the professor of chemistry that they have pursued courses of chemical study similar to either of the above may be examined by him at the beginning of the term, and if the examination is satisfactory they will be excused from attendance upon the courses in question.

The Chemical Department embraces every article of apparatus essential to the complete illustration of the principles of Chemistry.

The laboratories in the Mary F. S. Searles Science-

Building furnish unsurpassed advantages for special courses in analytical chemistry, urinary analysis, and toxicology. These courses are compulsory. They will be entered upon immediately after the close of the dissecting season.

Obstetrics.

The instruction in this branch is given by lectures, recitations, and quizzes, illustrated by models, manikins, and actual specimens.

Pathology and the Practice of Medicine,

Instruction will be given by means of lectures, by regular and systematic quizzes upon these lectures, and by charts. Especial attention will be given to the study of methods of physical diagonsis.

A medical clinic will be held by the Professor at the Hospital every Thursday, at 9 A. M., the material being furnished by the visiting physicians from the abundant resources of their wards, and by all members of the faculty as they have cases of interest which can be utilized for the illustration of subjects under treatment in the didactic course. The visiting physicians will hold additional clinics as the opportunity occurs. Definite announcements of these exercises will be seasonably made.

Bacteriology and Pathological Histology.

A. Bacteriology.

The course consists of lectures and laboratory work. In the laboratory course each student is required to cultivate upon three media ten varieties of pathogenic bacteria, to make stained microscopic preparations of each variety, and to study with the microscope the living organisms in hanging drop preparations.

Special attention is given to the examination of sputum for tubercle bacilli, to the diagonis of diphtheria by means of making smears from suspected throats on Loffler's blood-serum mixture, to the technic of the serum diagonis of typhoid fever, to methods of staining gonorrhœal pus.

B. Pathological Histology.

The course consists of lectures and laboratory work. The first half of the course is devoted to the study of inflammation excited by chemical and bacterial causes. It includes the pathological histology of tuberculosis, diphtheria, pneumonia, etc. The second half of the course is devoted mainly to the study of tumors.

In the laboratory course each student is required to make stained microscopical preparations illustrating the disease-processes studied. These preparations become the property of the student and are preserved for refrence. Many of these preparations are made from tissues obtained at the surgical clinics and thus show the pathology of cases previously observed.

SURGERY

The entire field of surgery is covered by the instruction in this department, excepting those portions coming under the heads of gynæcology, ophthalmology and otology. The didactic lectures are supplemented by ample bedside teaching. A clinic will be held at the Hospital, on Saturday at 9 A. M., the visiting surgeons of which place at the disposal of the professor whatever material in their wards he desires for illustration of the topics which he has in hand.

In addition to these systematic clinics students have the privilege of witnessing operations almost every day at the Hospital, and these will be explained and made as useful as possible by the surgeons. Opportunity will be given to observe the after-treatment and subsequent progress of the cases, sections of the class being permitted to visit the wards under the guidance of the surgeons on duty.

Minor and operative surgery recieve due attention, and the most practical character is given to the instruction, the students being required to apply bandages and other dressings, and performing operations upon the cadaver under the direct supervision of the instructor.

MATERIA MEDICA AND THERAPEUTICS

The instruction in Materia Medica and Therapeutics will be given by lectures and quizzes.

A practical exercise in prescription writing will be given every week, by which the student will be taught not only to write the prescription correctly but to prescribe correctly for given conditions.

MEDICAL JURISPRUDENCE.

The instruction in Medical Jurisprudence will be directed mainly to an exposition of the legal duties and responsibilities of physicians and surgeons to their patients and also to their character and position as medical expert witnesses in Courts of Justice. Practical suggestions will be given for guidance in both respects.

GYNÆCOLOGY.

Didactic and clinical instruction will be combined in the department of Diseases of women. Clinics on Tuesday at 9 A. M.

Abundant opportunities will be given to examine patients whose diseases come within the scope of this department. The various methods of diagnosis and treatment will be demonstrated.

DISEASES OF CHILDREN.

The instruction in this department will be given chiefly by lectures and recitations, and will also include clinical exercises and demonstrations.

MENTAL DISEASES.

The professor of this department is chief medical officer of the Pennsylvania Hospital for the Insane. Especial efforts are made to instruct the students in the early recognition of Insanity, with a view to the institution of treatment at the time when it is most productive of good results.

OPHTHALMOLOGY AND OTOLOGY.

A weekly clinic in diseases of the eye and ear will be held at the Hospital, on Saturdays at 11 A. M. The various

diseases will be described as cases illustrating them are available for demonstration, operations will be performed when required, and other treatment applied as may be necessary.

Public Hygiene.

Instruction is given by the President of the State Board of Health by lectures upon the principles of Public Sanitation, considering the source and character of public water supplies and the collection and disposal of waste, with especial reference to preventable diseases.

Several hours are devoted to sanitary legislation and the relations and obligations of the practising physician to public and health-boards, in the management of infectious diseases.

THE LIBRARY.

The library of the Medical School, containing 3700 volumes, has been combined with that of the College, which numbers nearly 60,000 volumes. Both collections are under the same administration and are at the service of the medical students. The more recently published medical works and curent numbers of professsonal journals are kept in a separate room in the main library building for their especial use. It is not the policy of the School to furnish text-books through its library, or to buy largely in medical literature; yet, by means of the catalogue of the Library of the Surgeon General's Office and the system of inter-library loans, the librarian is able to procure for use in serious investigation almost any book that may be desired.

TEXT-BOOKS.

ANATOMY—Gerrish. For reference, Quain.

PHYSIOLOGY—For recitation work, for the first year ,division Lea's Hand-book of Physiology. For the second year division, Kirkes, Blakiston's edition. For reference, Landois and Stirling, Foster, Dalton, the American Text-Book of Physiology by Howell, Kirkes.

CHEMISTRY—For general reference, Simon, Bartley, Pellew. For reference in urinary analysis, Purdy, Black, Tyson. For use in laboratory, Robinson's Qualitative Chemical Analysis.

PUBLIC HYGIENE—For reference, Coplin and Bevan, Rohe, Parke's Practical Hygiene.

MATERIA MEDICA AND THERAPEUTICS—Hare, White & Wilcox, H. C. Wood, Butler.

PRACTICE OF MEDICINE—Thompson, Osler, Anders, Medical Diagnosis, DaCosta. Clinical Diagnosis, Simon.

BACTERIOLOGY—Abbott's Manual of Bacteriology, Muir, and Richie.

PATHOLOGY—Ziegler's Text-Book ; Pathological Technique, Mallory and Right.

PHYSICAL DIAGNOSIS—Tyson, DaCosta, Page.

DISEASES OF CHILDREN—Holt, Rotch, Starr, Sachs.

SURGERY—The American Text-Book of Surgery, last edition, DaCosta's Modern Surgery, Dennis's System of Surgery, Park's Treatise on Surgery, Warren's Surgical Pathology and Therapeutics.

OBSTETRICS—American Text-Book of Obstetrics, Hirst, Jewett, Dorland.

DISEASES OF WOMEN—Kelley (2 vols.), Pozzi, (2 vols.), E. C. Dudley, Robb's Gynæcological Technique, Garrigues.

MEDICAL JURISPRUDENCE—Taylor with Bell's Notes, Ewell.

DISEASES OF THE EYE—Nettleship, Swanzay, DeSchweinitz.

CALENDAR.

1900.

27, December, Thursday. Entrance Examination: for first year students, at nine o'clock, in Brunswick.

28, December, Friday. Re-examinations, deferred examinations and examinations for advanced standing, for second year in Brunswick, in Anatomy, at nine o'oclock; in Physiology at two o'clock, P. M.

29, December, Saturday. Re-examinations, defered examinations, and examinations for advanced standing, for third year, in Portland, in Anatomy, at nine o'clock, A. M.; in Physiology at two o'clock, P. M.

31, December, Monday. Introductory Lecture, Memorial Hall, Brunswick, at three o'clock.

1901.

1, January, Tuesday. Holiday. No exercises.

22, February, Friday. Washington Birthday. Holiday. No exercises.

April. From noon of the Wednesday immediately preceeding Fast Day to the morning of the next Tuesday, Recess.

30, May, Thursday. Memorial Day. Holiday. No exercises.

17 to 25, June, Monday to a week from the next Tuesday, both inclusive. Examinations.

26, June, Wednesday. Graduating Exercises at nine o'clock, in Memorial Hall, Brunswick.

27, June, Thursday. Bowdoin College Commencement.

THE MAINE GENERAL HOSPITAL.

UNIVERSITY OF ILLINOIS-URBANA
